Products Available with an Anti-Microbial Coating

Automatic & Manual Doors Sales & Service

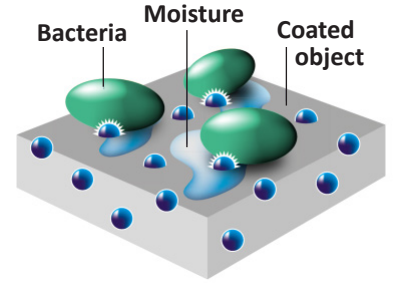

Visit www.doorservicescorporation.com for your nearest branch location
or email info@doorservicescorporation.com.

PRODUCTS AVAILABLE WITH ANTI-MICROBIAL COATING! *

Antimicrobial coatings are able to prevent germ growth for many applications. These are durable coatings that can continue to perform through regular, repeated water exposure and cleaning.

According to research at MarketsandMarkets, antimicrobial coatings are projected to become a requirement in high-traffic facilities in the coming years. Healthcare institutions, offices, retail spaces, academic environments and more will have more surfaces coated with antimicrobial agents.

HAND and ARM PULLS

Double thru-bolted, surface applied, dual use (top or bottom pull).*

Arm pull, surface applied, thru-bolted, 4 1/8" clearance.*

Mount above a pre-existing door pull for a quick hands-free addition, or use independently.

Rounded corners on the backplate, arm fits comfortably on the inside groove to open the door.

Classic hospital pull.*

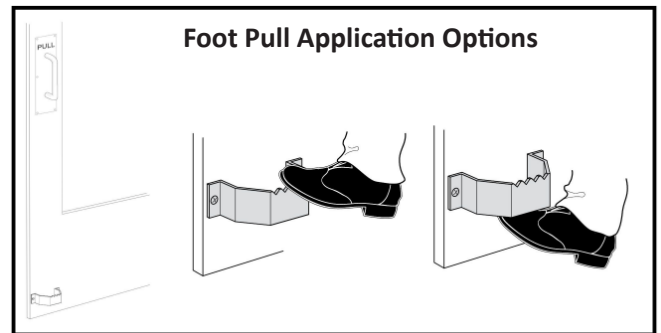

FOOT PULLS

Can be used with two different movements. See 'application' photo.

Double thru-bolted, surface applied, dual use. See application photo.*

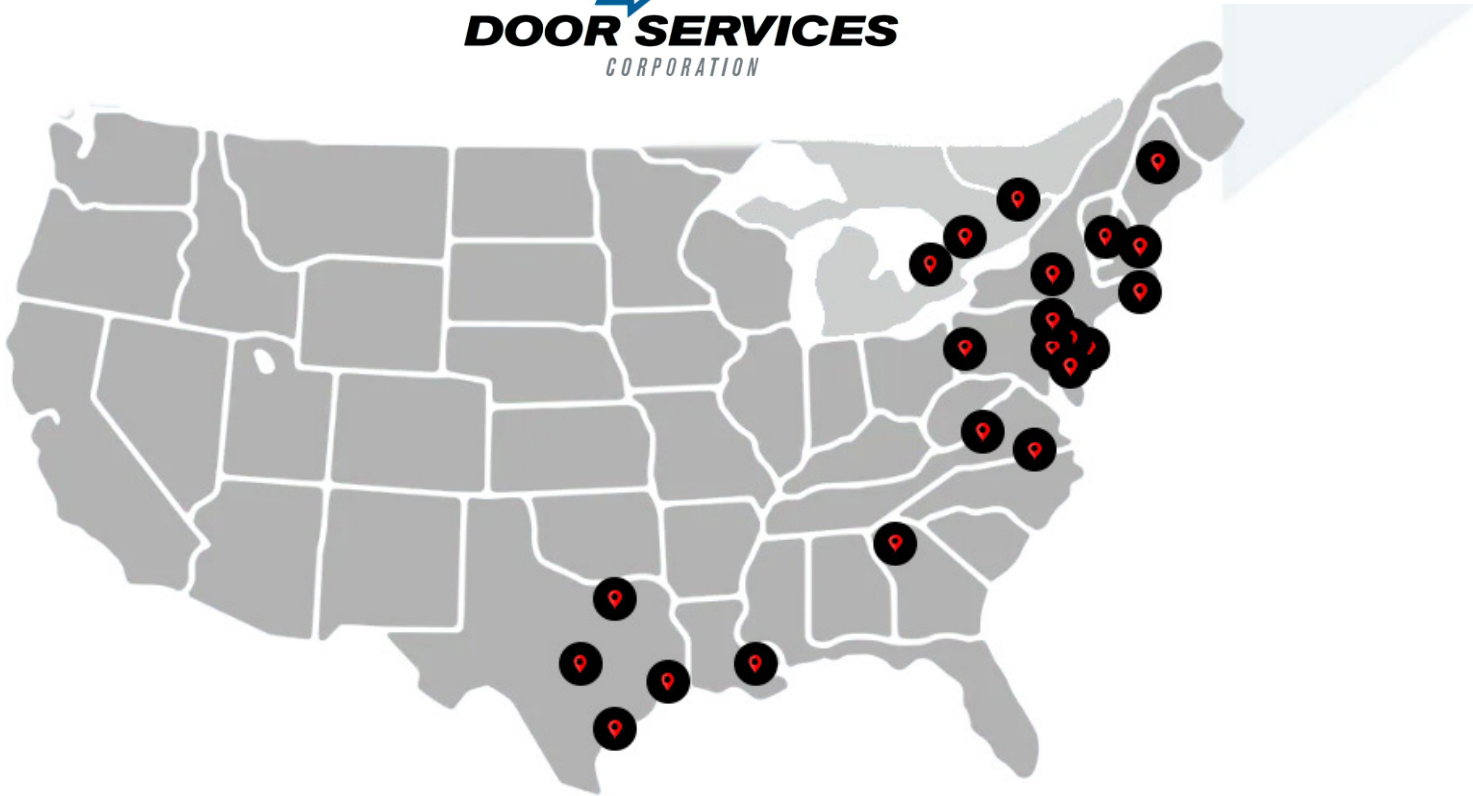

Strongest and most durable foot pull available. 'Soft Touch' foot guard.*

Ramped design eliminates stomping. Surface applied. 'Soft Touch' foot guard.*

Additional hands free designs available. Contact us today for questions or to schedule your installation. info@doorservicescorporation.com
